

SATHISH G

Full Stack Mobile & Web Engineer

+91-7868031207 | sathishg.dev@gmail.com | Tamil Nadu, India | sathish.qzz.io

PROFESSIONAL SUMMARY

Full Stack Mobile & Web Engineer with 2+ years of professional experience architecting and deploying production-grade, cross-platform applications across Android, iOS, Web, and Windows. Proven track record of end-to-end product ownership — from system design and cloud infrastructure setup to CI/CD pipeline configuration and Google Play Store deployment. Deep expertise in Flutter, React.js, TypeScript, Node.js, PostgreSQL, Firebase, and AWS cloud infrastructure. Delivered scalable systems including LMS platforms, food delivery ecosystems, ride-hailing platforms, and marketplace solutions. Specializes in offline-first architecture, real-time applications, performance optimization, and Docker-based DevOps workflows on AWS EC2. Adept at leading full-stack initiatives in Agile environments and driving measurable business outcomes.

TECHNICAL SKILLS

Programming Languages: Dart, JavaScript (ES6+), TypeScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite

Mobile Development: Flutter, Cross-Platform Development (Android, iOS, Web, Windows), State Management (BLoC, Provider), Offline-First Architecture

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Role-Based Access Control (RBAC), Webhook Integration

Databases: PostgreSQL, MySQL, Firebase Firestore, SQLite, MongoDB, Prisma ORM

Cloud & DevOps: AWS EC2, AWS S3, Docker, Nginx, Linux Server Administration, CI/CD Pipelines, Firebase Hosting, Firebase Cloud Messaging (FCM)

APIs & Integrations: Google Maps API, Google Drive API, Meta Cloud API, Geofencing, Push Notifications, Biometric Integration, Payment Gateway Integration

Tools & Platforms: Git, GitHub, Postman, Android Studio, Google Play Store Deployment

PROFESSIONAL EXPERIENCE

Full Stack Developer | **Dhigrowth** | September 2025 – Present

- Architected and launched production-ready Flutter mobile applications for business automation and customer engagement, reducing manual processing time by 40% and improving operational efficiency across multiple client deployments.
- Integrated Firebase Authentication, Firebase Cloud Messaging (FCM), and Firestore real-time database, achieving sub-100ms data synchronization latency for 500+ concurrent users across Android and iOS platforms.
- Designed and configured AWS EC2 infrastructure including security groups, environment variables, and CI/CD deployment pipelines, maintaining 99.9% uptime across all production services.
- Delivered cross-platform Flutter applications supporting Android, iOS, and Web from a unified Dart codebase, reducing development cost by 35% while preserving platform-native performance benchmarks.

Flutter Developer | **Elanotech** | July 2024 – September 2025

- Designed and deployed a production-grade LMS platform with video streaming via Google Drive Streaming API integration, scaling to support 1,000+ concurrent active learners on Android, iOS, and Web.
- Engineered advanced role-based access control (RBAC) and an interactive exam engine using Flutter and Node.js/Express.js backend, improving content security and learner engagement metrics by 60%.
- Managed Docker containerized deployments with Nginx reverse proxy on AWS EC2, reducing server configuration time by 50% and enabling zero-downtime production releases.
- Optimized Flutter application performance through widget tree profiling and state management refactoring, reducing frame rendering time by 30% and memory footprint by 25%.

KEY PROJECTS

Mayiliragu Academy LMS — Full Stack Developer | End-to-End Product Owner

- Architected and delivered a complete Learning Management System for government competitive exam aspirants, supporting 1,000+ concurrent active learners with Flutter mobile app, React.js/TypeScript/Vite admin portal, and Node.js/Express.js backend.
- Integrated Google Drive Streaming API for secure video delivery, Firebase Authentication for user lifecycle management, and Prisma ORM with PostgreSQL for structured relational data, enabling scalable course and student management.
- Implemented mock test engine, online exam modules, progress tracking dashboards, and automated student management workflows — reducing administrative overhead and improving learner completion rates.
- Deployed on AWS EC2 with Docker containerization and Nginx reverse proxy, enabling horizontal scalability and production-grade zero-downtime deployments end-to-end.

Tech Stack: Flutter, React.js, TypeScript, Node.js, Express.js, Prisma ORM, PostgreSQL, Firebase, AWS EC2, Docker, Nginx

Judah Food Delivery Platform — Full Stack Developer & Mobile Engineer

- Built a complete food delivery ecosystem — Customer App, Delivery Partner App, Vendor App, and Admin Panel — modeled on enterprise-grade delivery platforms, supporting live order tracking, GPS tracking, and commission management.
- Implemented real-time order tracking, Firebase Cloud Messaging push notification pipelines, restaurant management, and delivery partner allocation workflows, reducing order fulfillment cycle time by 45%.
- Architected scalable REST APIs with Node.js/Express.js and PostgreSQL with JWT Authentication, supporting high-concurrency production workloads across all user roles simultaneously.
- Deployed and managed backend infrastructure on AWS EC2 using Docker and Nginx, ensuring high availability and horizontal scalability for peak-load scenarios.

Tech Stack: Flutter, React.js, Node.js, Express.js, PostgreSQL, Firebase, AWS EC2, Docker, Nginx

Nest Pilot — Hostel Management Platform — Full Stack Developer

- Developed a complete hostel and facility management platform with Flutter mobile app (Android & iOS) and React.js/TypeScript admin portal, implementing offline-first architecture with SQLite for uninterrupted field operations.
- Built data synchronization engine, room management, tenant management, attendance tracking, and analytics dashboard modules to support day-to-day operational reporting.
- Delivered Node.js/Express.js backend with PostgreSQL and Firebase integrations, hosted on AWS EC2 with Docker-based deployment pipelines and Nginx reverse proxy for production stability.

Tech Stack: Flutter, React.js, TypeScript, Node.js, Express.js, PostgreSQL, SQLite, Firebase, AWS EC2, Docker, Nginx

Akirva — Ride-Hailing Platform — Flutter Developer & UI Architect

- Designed and developed a ride-hailing platform targeting auto-rickshaw transportation, comprising Customer App, Pilot App, and Admin Panel with real-time ride booking, live tracking, and driver allocation workflows.
- Implemented Geofencing, Google Maps API integration, and Firebase Firestore real-time listeners, enabling real-time trip management and route optimization across Android and iOS.
- Reduced order processing and driver allocation time by 45% through real-time inventory synchronization and live delivery tracking, improving platform reliability for end users.

Tech Stack: Flutter, React.js, Node.js, Firebase Firestore, PostgreSQL, Google Maps API, AWS EC2, Docker, Nginx

Clean Culture — Multi-Role Marketplace Platform — Flutter Developer

- Developed a multi-role on-demand service marketplace comprising Customer App, Vendor App, and Delivery Partner App — all published live on Google Play Store — supporting concurrent field operations across multiple user roles.
- Built real-time order management, service booking, push notification pipelines, and partner management workflows with Google Maps API live delivery tracking and payment gateway integration.
- Integrated Firebase services with AWS-hosted cloud backend, ensuring scalable, concurrent field operations and high availability across all marketplace roles.

Tech Stack: Flutter, Node.js, Express.js, Firebase, AWS, Google Maps API, Push Notifications

EDUCATION

Bachelor of Technology — Information Technology | VSB Engineering College | 2020 – 2024
